PROFESSIONAL SUMMARY

Fresh Computer Science graduate with practical experience in web development, IT support, and database management gained through internship training at the Local Government Unit of Tubigon. Contributed to the development of web-based municipal systems, including a conference room reservation system that improved administrative processes. Skilled in HTML, CSS, JavaScript, SQL, Microsoft Office, and AI productivity tools, with strong adaptability, collaboration, and problem-solving skills in fast-paced environments.

EXPERIENCE

OJT Programmer / Web Developer / IT Support – LGU Tubigon

June – July 2025

- Developed and supported web-based systems for municipal offices.
- Provided technical and administrative ICT support.
- Contributed to the MPDC Conference Room Reservation System.

PROJECTS

- HRConnect-Tubigon – A web-based HR information system developed for employee records, attendance tracking, leave management, travel order processing, and Daily Time Record (DTR) monitoring in the Local Government Unit of Tubigon.
- PhySiSim – An interactive physics simulation system designed to improve learning and visualization of physics concepts.
- MPDC Conference Room Reservation System – A reservation management system created to organize and streamline room booking processes.
